

MKA S.T.E.A.M. Summer Camp

The Amazing Human Body

Summer camp is rapidly approaching! We have a fabulous curriculum that will lead the students on a scientific adventure while they explore different areas of S.T.E.A.M. (science, technology, engineering, art and math). While at camp, the students will continue with Montessori Language Arts and Mathematics lessons. During the work cycle, the students will work with the traditional Montessori materials and lessons. In Language Arts, they will continue to work on reading comprehension, grammar and proper writing techniques. In mathematics, they will explore fractions, the four operations, geometry, and critical thinking. There will be daily handwriting practice and journal writing. Each week's theme will bring new excitement to the students as they learn more about the world. They will explore hands on activities as they discover the magic of science, while learning about different artists and composers. The students will also do daily art projects that will develop fine motor control as well cultivate creativity.

In addition to the academic aspect of the camp, the students will also have different enrichments. Each week will include an art enrichment, daily arts and crafts, a cooking enrichment, water park play, science experiments and projects, and a field trip. Every Friday the ice cream truck will visit the school and the students can purchase an ice cream treat, if desired. There will also be an optional fabulous overnight camping adventure.

If you have any questions about the academic component of our summer camp, please feel free to stop by the front desk or speak to Ms. Tara. We are looking forward to going on this summer adventure with your child!
